

To make the bridge viable the ACC needs to reassess the height of the bridge and set a reasonable height. Even though the resource consent was extended, I would assume that it has now expired.

Making Drury a Destination.

These are my thoughts as to the value that could be added if the bridge was built.

The clearing on the motorway side of the bridge could be developed into a science court.

Projects built by individuals enhancing the environment. Water driven power, windmills, solar, pedal driven. Hand on kind of stuff the people can see, hear, touch. Water pumps, maybe some vintage stuff, maybe some

Art

There is quite a large area behind Warren McLean yard, which would make an excellent nursery, run by locals, a community garden, or as a business profits going back to new development.

In Behind the Anglican Church, Norrie Rd end of the track, is a perfect spot for a BMX track.

The walkway would be a great place to run a small train track alongside the walking track. There are lots of good examples of the tracks around NZ. This could also raise money for future development.

Dogs love walking tracks.
